

# The PCM 330

Professional Catamaran Manufacturing (PCM), located in Antalya Free Zone – Turkey, is proud to introduce its latest semi-displacement power catamaran, the PCM 330, designed by Schionning Designs.

Our catamarans are built with cored (DIAB PVC foam) composite construction techniques, using epoxy or vinylester resin (SICOMIN/HEXION or DSM) and stitched fabrics like biaxial/quadraxial.

PCM 330 can take rough seas, because of narrow entrance and semi-displacement hull shape that does not need to step on plane to reach high speed.

**Length:** 32.81 ft/10 m  
**Beam:** 15.10 ft/4.60 m (perfect for a marina)  
**Draft:** 1.65 ft/0.50 m  
**Cruising Speed:** 14.2 kts (2 x 40hp)  
**Top Speed:** 18 kts (2 x 40 hp)

Whether she goes 2 knots or 20 knots the hulls are parallel to the water and the angle of the boat to the water stays the same.

PCM 330s distance from the waterline up to the bridge deck prevents water slamming under the bridge deck and gives you a smooth-ride feeling.

The hull shape is efficient at all speeds... resulting in reduced fuel consumption and the possibility of equipping the PCM 330 with outboard engines (2 x 25 hp to 2 x 250 hp).

The PCM 330 has two double cabins in the front and one cabin in the starboard aft. It has one big bathroom (2.5m long), but has two separate wash basins with hot/cold water and a shower in the port aft. Inside this bathroom there is a door that brings you to a separate head with its own wash basin with hot/cold water.

With 3 cabins the PCM 330 is comfortable and can take you for a pleasant cruise at a reasonable price.

The galley is on the bridge deck, together with the saloon. There is a wooden table and bench seating for 6 people which can be converted to a double bed as can the one in the saloon. A panoramic view through the non-opening windows is one of her pleasant offerings.

The generous cockpit allows boarding through doors on either side and has seating for 8 people at two handcrafted wooden tables.
